KURUME AZALEAS

The demand for Kurume Azaleas as pot plants for florists has been growing by leaps and bounds. When these plants are potted in light peaty soil and kept in moderately warm house, they will come into bloom in about 60 days.

We are growing thousands of excellent Kurumes for florists' use. Varieties such as Coral Bells, Salmon Beauty, Hinodegiri and Snow. We think they are a very quick and profitable crop.

CAMELLIA JAPONICA

It is common knowledge that there is some confusion in the horticultural names of Camellia Japonica. We have carefully checked the blooms and general characteristics of the varieties in our collection in an effort to eliminate any duplication. We believe that others in the trade will generally recognize the varieties we offer in this price list by the names under which they are listed.
